What's the Answer to the Mileage Question?

Miller Tires

If They're On Your Car—
BECAUSE Miller builds mileage into the tire for you with a shock-resisting back-bone of cotton fabric that has not had its natural vegetable wax and oil cooked out of it during manufacture. And because of the right kind of rubber compound vulcanized into a perfect unit with the fabric, with the wearing qualities of each retained, and with no point of cleavage in the construction. You cannot get mileage out of a tire that price prohibits the builder putting into it. This mileage question is never settled until it is answered right. With Miller Tires on your car you put the mileage and skid questions out of your mind.
